

PROJECT	Thunder Bay Grille Pewaukee, Wisconsin
DETAILS	K-13 Green Custom Color 2" Thick 5,000 sqft

Thunder Bay Grille, located in Pewaukee, Wisconsin, just outside of Milwaukee, is the perfect escape for a quick work lunch or a special event booked in one of their private dining rooms. The restaurant's spacious chic interior is the perfect juxtaposition of contemporary style and rustic elements creating a uniquely urban ambiance that still manages to remain comfortably casual.

With such an expansive menu and energetic atmosphere, the restaurant has managed to establish itself as an ideal place to enjoy happy hour. With popularity, comes noise. The application of dark green K-13 to the ceiling of the birch bar and dining area not only adds to the interior aesthetics but aids in sound control. Once K-13 has been applied, it absorbs unwanted sounds; leaving the space comfortable yet lively, while still contributing to the décor. K-13 is

available in six standard colors but can be matched to any color and applied to almost any surface.

Contact International Cellulose Corporation today at (800) 444-1252 or visit us online at www.spray-on.com for complete details on how ICC can improve your building projects. ICC also offers architects an AIA/CES HSW SD Lunch N Learn program both live and on-line on the subject of Solving Architectural Noise Problems.
