SonaSpray "fc" acoustical finish®

DESIGN SOLUTION
HOTEL

PROJECT	Hotel V Nesplein Amsterdam, The Netherlands
DETAILS	SonaSpray "fc" Custom Color 1/2" Thickness 2,200 Sq. Ft.

Located in the heart of Amsterdam's Theatre District, steps away from Dam Square, Hotel V Nesplein offers luxury accommodations for guests seeking the authentic city experience. The Hotel's retro, stylish interior features bold design details, which include: a massive chandelier, exposed ductwork, mix-matched pendant lighting, and unique wall coverings, tastefully balanced with collective materials, and neutral colors.

SonaSpray "fc" was applied to the concrete ceiling in the lobby, restaurant/ bar, and reception area. The application of SonaSpray "fc" absorbs excessive noise, which would have otherwise been prevalent in a space of this type. To ensure the application would not compromise the hotel's chic design, SonaSpray "fc" was produced in a custom, integral color, made exclusively for Hotel V.

Indoor pools, restaurants, libraries, offices, hotels, and exhibit halls are just a few of the many types of projects in which SonaSpray "fc" can be utilized to provide an attractive acoustical treatment. For new construction or renovation projects, ICC's family of products offer the ideal ceiling treatment for any thermal or acoustical insulation need.

Contact International Cellulose Corporation today at (800) 444-1252 or visit us online at www.spray-on.com for complete details on how ICC can improve your building projects. ICC also offers architects an AIA/CES HSW Lunch N Learn program both live and on-line on the subject of Spray-Applied Acoustical Finishes.

WHY DO YOU NEED TO CONSIDER ACOUSTICS?

Modern interior design often consists of hard surfaces and materials, which reflect sound. For this reason, many restaurants and entertainment venues have become synonymous with excessive noise.

To effectively treat acoustics within this type of environment, sound absorption is essential. SonaSpray ”fc” is well suited for use in these areas as it is both attractive and beneficial.

SonaSpray “fc” is spray-applied, and can adhere to virtually any common substrate, or surface configuration. SonaSpray “fc” is available in standard colors, and can also be produced in custom matched, integrated colors.

Warehouse Bar & Grille

Boston, MA

Warehouse Bar & Grill is a masterful fusion of an Upscale Eatery, and neighborhood Sports Bar. Edgy design details include concrete flooring, industrial lighting, open ductwork, and metal accents that give the restaurant its stylish, “warehouse” look. To prevent the restaurant from sounding like a real warehouse, K-13 Dark Gray was applied to the open truss ceiling. K-13 absorbs the unwanted sound produced by the numerous hard surfaces throughout the space, while enhancing the industrial look.
