DESIGN SOLUTION
RESTAURANTS

PROJECT	Jason's Deli USA
DETAILS	K-13 Custom Color Black Bean 1" Thick

Jason's Deli is a leading fast casual restaurant with headquarters based out of Beaumont, Texas. In over fifty locations nationally, K-13 was specified by the in-house architectural team at Jason's Deli to combat excessive noise in the restaurant. K-13 absorbs unwanted echo and reverberation while enhancing ambient sound.

In addition to the acoustic benefits, K-13 was manufactured in Custom Color Black Bean to achieve the aesthetic goals of the project. The restaurant is modeled after the modern industrial warehouse, designed with an elevated dining area. The wood and natural texture of the K-13 exposed finish elegantly contradict the industrial style of the exposed ductwork and brick.

K-13 provides exceptional acoustic and thermal insulation and is a superior choice for your new construction or renovation project. It is available in standard and custom colors and can adhere to virtually any substrate configuration. K-13 is manufactured by International Cellulose Corporation, the industry's leading developer and manufacturer of spray-applied cellulose thermal and acoustical finishes.

Contact International Cellulose Corporation today at (800) 444-1252 or visit us online at www.spray-on.com for complete details on how ICC can improve your building projects. ICC also offers architects an AIA/CES HSW Lunch N Learn program both live and on-line on the subject of Spray-Applied Acoustical Finishes.

Warehouse Bar & Grille

Boston, MA

Warehouse Bar & Grille is a masterful fusion of an upscale eatery and neighborhood sports bar. Edgy design details include concrete flooring, industrial lighting, open ductwork, and metal accents that give the restaurant its stylish, “warehouse” look. To prevent the restaurant from sounding like a real warehouse, K-13 Gray was applied to the open truss ceiling. K-13 absorbs the unwanted sound produced by the numerous hard surfaces throughout the space, while enhancing the industrial look.
