

SonaSpray® "fc"
Acoustical finish

PROJECT PROFILE

INDOOR POOLS

PROJECT

Center Grove High School
Indianapolis, IN

ARCHITECT

The Inter Design Group
141 East Ohio
Indianapolis, IN 46204

DETAILS

SonaSpray® "fc" Arctic White
15,000 Square Feet
3/4" Thickness

The exceptional acoustic performance of SonaSpray "fc" provides the Center Grove High School indoor pool with much needed noise control.

Without SonaSpray "fc", the wide open area and reflective surfaces would amplify noise to the point where instructions and communication during swim practices and meets would be nearly impossible. The 3/4" application of SonaSpray "fc" effectively eliminates these problems by providing an NRC of 0.80 on this ribbed metal deck.

SonaSpray "fc" also provides the pool with several other improvements. Since it is spray-applied, SonaSpray "fc" covers the irregular ceiling with a monolithic coating. Combined with the appropriate level of ventilation, SonaSpray "fc" helps to reduce condensation in the pool area. In addition to outstanding acoustic and

condensation control, the Arctic White SonaSpray "fc" will provide the pool with a bright, attractive ceiling for years to come.

Superior acoustic control, a highly reflective finish, the ability to conform to any substrate configuration and an attractive, uniform texture made SonaSpray "fc" the best ceiling finish for the Center Grove High School indoor pool. For new construction or renovation projects, ICC's family of products offer the ideal ceiling treatment for any thermal or acoustic insulation need. Contact International Cellulose Corporation today at (800) 444-1252 for complete details on how ICC can improve your building projects.
