

# DESIGN SOLUTION CONVENTION CENTERS

## PROJECT

Galveston Island Convention Center  
Galveston, TX

## ARCHITECTS

Morris Architects  
1001 Fannin  
Suite 300  
Houston, TX 77002

## DETAILS

K-13® Tan  
1" Thick  
140,000 sq. ft.

The Galveston Island Convention Center at The San Luis Resort is conveniently located 40 miles south of Houston, the fourth largest city in the United States. Centrally positioned, the convention center combines unparalleled views of the Gulf of Mexico and first-class meeting facilities to create the perfect combination of executive conference facilities with relaxing resort amenities.

K-13 was chosen for the exhibit hall acoustics. Tan K-13 matched the décor perfectly. Applied to the ceiling at a thickness of 1", K-13 provides the acoustics and reduces the reverberation time making speech and music more intelligible.

K-13 is available in six standard colors: Tan, Beige, White, Lt Gray, Black, and Gray. Custom colors are also available, call International Cellulose for details.

Sports facilities, schools, restaurants, retail facilities, gymnasiums, convention centers and churches are a just a few of the many projects that benefit from K-13. Contact International Cellulose Corporation today at **(800) 444-1252** or visit us online at [www.spray-on.com](http://www.spray-on.com) for complete details on how ICC can improve your building projects.
