

# DESIGN SOLUTION

## PARKING GARAGE

**PROJECT** Burger King World Headquarters  
Miami, FL

**ARCHITECT** Hellmuth, Obata & Kassabaum  
St. Louis, Mo

**DETAILS** K-13 Beige  
2.75" Thick  
90,000 Sq. Ft.

K-13 has been installed to over 90,000 square feet of parking deck ceilings in Burger King's World Headquarters which are directly below conditioned spaces. Sprayed to a thickness of 2.75", K-13 provides an R-value of over 12 to the concrete/floor ceiling assembly.

The color scheme for Burger King's World Headquarters is predominantly earth tones and K-13 Beige was selected to match the color palette. K-13 is available in seven standard colors and custom colors.

K-13 utilizes a patented adhesive system that provides a strong, durable bond to virtually any substrate including concrete, metal, wood, glass, Styrofoam and urethane. This adhesive system also provides K-13 the capability of being installed thicker in one application, greatly reducing the installation time of high R-value installations such as the Burger King's World Headquarters.

No matter what your design requirements and budget constraints are, ICC's products can be customized

to meet your needs. Parking garages, warehouses, restaurants, gymnasiums, sports facilities, and schools are just a few of the many types of projects that benefit from K-13. Whether for new construction or renovation, International Cellulose has an acoustical and thermal solution to help you create the ideal space.

**Contact International Cellulose Corporation today at (800) 444-1252 or visit us online at [www.spray-on.com](http://www.spray-on.com) for complete details on how ICC can improve your building projects. ICC also offers architects an AIA/CES HSW Lunch N Learn program both live and on-line on the subject of Spray-Applied Acoustical Finishes.**
