

Project Details

Name: Tacos A Go-Go
Location: Houston, Texas

Product Details

Product: K-13
Details: Black

Tacos A Go-Go is a Houston-based Tex Mex Taqueria serving up an assortment of tacos, fajitas, quesadillas, and other authentic plates bursting with fresh flavors and local ingredients in a casual, fun environment. K-13 Black was utilized to provide sound control for their new location in the vibrant Oak Forest neighborhood.

Acoustics played a key role in the design of this location in particular to accommodate live music and entertainment while ensuring a comfortable environment for guests. Applied to the exposed metal deck ceiling, the application of K-13 in black makes the interior feel wider and higher while complimenting the vibrant colors and “Mexican kitsch” design. In addition to acoustic performance, K-13 provides thermal R-value increasing energy efficiency.

HARD ROCK CAFÉ

DETROIT, MICHIGAN

K-13 Thermal and Acoustical Insulation was applied to the ceiling of the Detroit Hard Rock Cafe in an attractive black finish. K-13 absorbs sound energy instead of reflecting it and reduces reverberation time making it an ideal application for a live music venue or restaurant. The first Hard Rock Café opened its doors in 1971 when Rock N' Roll was at its peak. Now, there are 171 venues across the United States. Being a live music venue and a business that centers itself around sound, it's no question why the Hard Rock Café needed superior acoustics in their facilities.

Acoustic Performance

K-13 is applied in thicknesses from 1" up to 5" to provide the desired level of acoustical absorption. At 1", K-13 provides a NRC of .80.

Thermal Value

K-13 has a R-Value of 3.75 per inch. This demonstrates how K-13 helps keep a space at the right temperature, saving on costs and the environment.

Application

K-13 is spray-applied, between 1" and 5". It is engineered for application to common substrates and can adhere to complex or irregular surfaces.

Colorful Options

K-13 is available in standard colors, and can be manufactured in custom, integral colors for unlimited design options.
